Text-book: Linear Algebra with Applications,
 MacGraw-Hill
 Author: W. Keith Nicholson

There are computer assignments for this lecture. Each of the problems in each of the assignments counts for 1/10 of a point. Together in all of the assignments there are more than 220 problems. The maximum given for the assignments is 20 points (which then will be scaled by $20 \times \frac{5}{4}$ to give 25 points for the assignments.) Nevertheless, it is a good idea to do all of the problems as this will help to do the the tests, because the problems on the two tests will mostly be chosen from or at least be very similar to the computer assignments.

In order to access the computer assignments go to <http://math.ucalgary.ca/webwork/> and click on MATH 211 L06 (Sauer). Username is your IT username and password is your IT password.
Beware: Each of the assignments has an Open Date and a Due Date.

The **midterm test** counts for 25 points and will be on Wednesday, October 21.
EVENING, ENA 101 and 103, 6:00 to 7:30 pm.

The **final** counts for 50 points.
